

HARSH MAHOUR

FULL STACK DEVELOPER

Delhi, India

+91 7827103180

mahourharsh19@gmail.com

Summary

Dedicated and results-driven Full Stack Web Developer with over 2 years of hands-on experience in designing, developing, and maintaining dynamic web applications across a wide range of industries. Highly proficient in front-end technologies such as HTML, CSS, JavaScript, and Bootstrap, with strong back-end expertise in PHP, Laravel, and MySQL. Holds an O-Level certification in Information Technology, providing a solid academic background and technical foundation. Recognized for writing clean, maintainable, and efficient code, while seamlessly bridging the gap between front-end design and back-end functionality. Skilled in collaborating within agile development environments, consistently meeting tight deadlines, and delivering scalable, high-performance, and user-friendly solutions that align with business objectives. Passionate about continuous learning, staying updated with the latest industry trends, and leveraging new technologies to drive innovation and improve project outcomes.

Work experience

Full-Stack Web Developer Intern IANT (Institute of Advance Network Technology) -New Delhi, India | Jan 2024 – Mar 2024

- Developed a user-friendly and fully responsive e-commerce website for Mitali Enterprises, ensuring seamless performance across all devices.
- Implemented login and role-based access control for Admin, HR, Teachers, and Students, maintaining simplicity and security without requiring email verification.
- Rebuilt and launched IANT's website using Laravel, PHP, and React, resulting in faster load times and a lower bounce rate.

Front-End Developer

Nimble Creation -New Delhi, India | Jun 2023 – Dec 2023

- Designed and maintained mobile-responsive web pages using HTML, CSS, JavaScript, and Bootstrap, ensuring consistent high performance across devices and browsers.
- Built dynamic server-side applications using Laravel and PHP, integrated with MySQL databases.
- Maintained website performance, debugged issues, and implemented security best practices.

Education

IA NT | DELHI, India

Full Stack Development Training | IANT

Completed an intensive Full Stack Development course at IANT, gaining strong expertise in both front-end and back-end technologies. Developed and deployed dynamic web applications with a focus on scalability, security, and performance.

Proficient in HTML, CSS, JavaScript, React, AngularJS, and jQuery for building responsive, interactive user interfaces. Skilled in PHP, Laravel, Python, and SQL for server-side development, database management, and authentication systems. Experienced in SQL database design, query optimization.

NIELIT | DELHI, India **O-LEVEL | NIELIT**

I completed my O-Level certification in Information Technology from NIELIT (National Institute of Electronics and Information Technology), where I gained a strong foundation in computer science and software development. The course included subjects such as IT Tools and Network Basics, Web Design, Programming with Python, Database Management, and IoT. This training equipped me with both theoretical knowledge and practical skills, laying the groundwork for my career as a full-stack web developer.

School Education | Delhi, India

12th and 10th passed from CBSE Board in year 2022 and 2020 respectively .

Skills

HTML, CSS, Bootstrap, Javascript, PHP, Laravel, Mysql and canva

Projects

- Developed the front-end of the IANT website using HTML, CSS, JavaScript, and Bootstrap, creating responsive and user-friendly pages optimized for speed and cross-browser compatibility, significantly enhancing both user experience and visual appeal.
- Developed a custom portfolio website for a graphic designer, focusing on a visually appealing, responsive layout and optimized performance for faster loading and smooth navigation.
- Developed a fully responsive and user-centric website titled "TechVoid" utilizing HTML, CSS, Bootstrap, and JavaScript, with a focus on delivering a seamless and optimized experience across all devices.
- Developed a responsive Weather App using HTML, CSS, JavaScript, and the OpenWeather API, capable of fetching and displaying real-time weather data including temperature, humidity, and general conditions. Integrated features such as unit switching between Celsius and Fahrenheit, along with input validation for a smooth user experience.
- Developed a basic registration form using PHP and MySQL that allows users to enter personal details, upload documents, and add comments, with all submitted information securely stored in the database.
- Implemented a login system with role-based access control, ensuring a simple yet secure user experience. Restricted access to the panel, allowing only authenticated users to log in, with permissions distributed according to assigned roles (Admin, HR, Teacher, or Student). Migrated existing site content into an easily accessible platform without requiring email verification.
